

Section insulator ETB 1200 V for cut-in switches and crossings, L = 610 mm (for rigid, U 88, U 99)

Item number B0933-02

Dimensions

length: 610 mm
width: 164 mm
height: 90 mm
length of suspension above eyes: braced
width of suspension above eyes: braced
length between the contact line: 435 mm

Material and weight

material: INOX / PA / GFK
weight: 5.5 kg

Loads

breaking load: 39.6 kN

service load: 15 kN

Function

For the electrical separation of adjacent contact line sections. Taking into account the max. width of the pantograph head, the two sectors are never connected.

Specification

operating voltage: 1200 V DC
kerf width: 5.6 mm
creepage distances: 435 mm
arcing horn distance: 375 mm
contact-wire cross-section: 80-120 mm²
