

# Wooden measuring angle

Item number WD1127-01

## Material and weight

Weight: 2.100 kg

## Function

For trolleybus: To stake off the centerline of the overhead contact line in curves and in tangent.

To determine the angle of deviation of switches and crossings. For trolleybus and tramway: To determine the angle of ETB/TW crossings.

## Comments

- For deflection angle of the contact wire of max. 30°
